

Marijuana is steadily going the way of alcohol in the United States: it will soon be completely legal. • As of mid-2015, nearly half of the United States and Washington, DC, had legalized marijuana use in some form. Most of these allow only medical, though four of those twenty-three states plus the District of Columbia allow recreational use of marijuana as well. • Experts anticipate that in 2016 at least four more states, and up to nine, will legalize the substance more completely than they currently allow. • Though powerful advocates for legalization in other states are in the minority, those states will at some point in the not too distant future pass legalization laws. True Bud is a resource for everyone who uses weed, parents of young people who smoke weed and eat eatables, and health professionals. It covers medical weed, gang weed, and the new forms of weed known as Dabs and wax. It also deals with the dangers of K2 and synthetic weed, helping to paint a complete picture?social, legal, and medical?of the interesting and ever-changing world of pot. The Briarcliff Institute for Recovery and Development has found that many kids tested for toxicity have Toxic Marijuana Syndrome , which must be dealt with
