

An up-to-date introduction to the theory, instrumentation and applications of FT-IR spectrometry, including new and emerging techniques. Designed to allow actual and potential users of the technique to plan their experimental procedures correctly. Easy-to-read, logical presentation makes this sophisticated subject accessible to students as well as chemists and analysts. End of chapters references. Index.

Praying with Your Children: A Guide for Families, Are You Considering Psychotherapy?, The Sword of Summer: Magnus Chase and the Gods of Asgard, Book One, Batty Malcoonys Mystic Carnivale, Applied Partial Differential Equations with Fourier Series and Boundary Value Problems: Pearson New International Edition, Basic Physical Chemistry for the Life Sciences, Where is the King?, Common Household Pests: Homeowners Guide to Detection and Control, Ablative Nano- Composites: Rubber as Ablative Nano-Composite material,
