Full text of Logarithmic and other mathematical tables : with LOGARITHMS OF TRIGONOMETRIC FUNCTIONS. The logarithm of a natural number is the exponent of the power to which some assumed . To find the logarithms of such numbers the process of interpolation is necessary. also and move the decimal one place to the left. We then add the two sums to the logarithm. 6. Interpolated Six-Place Tables of Logarithms of Number and the Natural and Logarithmic Trigonometric Functions has 0 reviews: Published **Logarithmic and other mathematical tables, with - JScholarship** It is hoped that the combination of Gudermanns tables with those presented it is desirable to have tables to a greater number of significant figures. Ligowski gives six-place tables of natural values of hyperbolic functions, but As previously pointed out, the following tables contain tabulations of \log^5 : - x^X and $\log - \text{---}$. **none** Interpolated six-place tables of the logarithms of numbers and the natural and logarithmic trigonometric functions.
