

Genome Mapping and Genomics in Arthropods (Genome Mapping and Genomics in Animals)

The series Genome Mapping and Genomics in Animals provides comprehensive and up-to-date reviews on genomic research on a large variety of selected animal systems, contributed by leading scientists from around the world. The huge amount of information hitherto dispersed in journals is now available in this clearly structured reference work. Arthropods covered here include honeybee, bumblebee, the parasitic Jewel Wasp, silkworm, pea aphid, mosquito, Hessian fly and tick.
