

Designed to help students make the leap from learning about research to doing research, *How To Do Research* by Jane F. Gaultney and Hannah D. Peach provides an easy-to-understand walkthrough of the entire research process, from selecting a topic and conducting a literature review through presenting an APA-style paper or presentation. All of the 15 cross-disciplinary labs included are appropriate for use in the social, behavioral, and health sciences, and follow a consistent format: objective, description of a journal article, canned data, examples of what output should look like, pointers on interpreting the output, and a suggested activity for those who wish to collect their own data.

Handbook of Quality Assurance for the Analytical Chemistry Laboratory, Smart Kids Picture Atlas (Smart Kids Reference), Regulation of Smooth Muscle Contraction (Advances in Experimental Medicine and Biology), Analytical Chemistry (with the National College for the pharmacy professional medical teaching adult education specialist)(Chinese Edition), Ancient Greece (Collins Primary History), Truck Trouble (Eyewitness Readers), The Prayer Diet: The Unique Physical, Mental, and Spiritual Approach to Healthy Weight Loss, Praelectiones metaphysicae specialis Volumen Primum Cosmologia, Z for Zachariah (English and Spanish Edition),
