

# How To Do Research: 15 Labs for the Social & Behavioral Sciences

Designed to help students make the leap from learning about research to doing research, *How To Do Research* by Jane F. Gaultney and Hannah D. Peach provides an easy-to-understand walkthrough of the entire research process, from selecting a topic and conducting a literature review through presenting an APA-style paper or presentation. All of the 15 cross-disciplinary labs included are appropriate for use in the social, behavioral, and health sciences, and follow a consistent format: objective, description of a journal article, canned data, examples of what output should look like, pointers on interpreting the output, and a suggested activity for those who wish to collect their own data.
