

Proteins LabFax

Proteins Labfax is a detailed and comprehensive compendium of information on protein chemistry, and the purification and physical characterization of proteins. The book provides data on all the procedures used on a regular basis by researchers studying proteins, including chromatography, crystallization, size determination, computer-aided structure analysis, amino acid analysis, and the chemical modification of amino acid side chains. General data is also given on buffers, salting out, criteria of purity, expression systems, and protein stability. The contents of Protein Labfax have been carefully chosen to complement the data presented in its companion volume, Enzymology Labfax.

* * Serves as a companion volume to Enzymology Labfax* Comprehensive coverage of protein chemistry and the purification and physical characterization of proteins* Extensive information presented on procedures used regularly by researchers* A complete one-stop source for biochemists and researchers in the field
