

This volume includes 20 contributions of the 12th meeting on Analytical Ultracentrifugation from March 1-2, 2001 in Duisburg, Germany. Various fields of ultracentrifugation are covered concerning research problems in biochemistry, biophysical chemistry and macromolecular chemistry as well as interacting systems. New investigations concerning the sedimentation theory are presented. The phase transition of gels is dealt with, as is the sedimentation-diffusion equilibrium of gels. One section contains the hydrodynamics of biopolymers.

The Apiary, Or, Bees, Beehives, and Bee Culture; Being a Familiar Account of the Habits of Bees and the Most Improved Methods of Management, Scripting Addiction: The Politics of Therapeutic Talk and American Sobriety, How To Be Heard In Heaven, X-Men Forever 2 - Volume 3: Perfect World (X-Men Forever (Numbered)), A Tale Of Two Cities..., Woodland Management: A Practical Guide - Second Edition, Sleepwalkers, The: A History of Mans Changing Vision of the Universe, Capacity adequacy in the Nordic electricity market (TemaNord Book 2015560), Journey to Nowhere (Remembrance Nye),
