

Space groups (194) P63/mmc - (190) P-62c (Landolt-Bornstein: Numerical Data and Functional Relationships in Science and Technology - New Series)

This volume deals with crystallographic data of both intermetallic and classical inorganic compounds, updating Landolt-Bornstein volumes III/6 and III/7. The text organizes known crystal structures according to their type of structure; each structure type is therefore represented by a complete set of crystallographic data holding for all isotopic structures, with the data comprising space group, cell parameters and atom coordinates.
