

This revised and greatly expanded edition of the Russian classic contains a wealth of new information about the lives of many great mathematicians and scientists, past and present. Written by a distinguished mathematician and featuring a unique mix of mathematics, physics, and history, this text combines original source material and provides careful explanations for some of the most significant discoveries in mathematics and physics. What emerges are intriguing, multifaceted biographies that will interest readers at all levels.

Insect Physiology (Science Paperbacks), Stand Still, Poplars and Willows (FAO Forestry Series), The Inflationary Universe: The Quest for a New Theory of Cosmic Origins, Use of agricultural machinery operation and maintenance (secondary vocational and technical schools. agricultural use of animal husbandry and fisheries specialized materials and maintenance)(Chinese Edition),

Tales of Our Forefathers - Mathematics - Caltech G5613 1988 530.09 87-24971
