

This book explains aircraft structures so as to provide a basic understanding of the subject and the terminology used, as well as illustrating some of the problems. It provides a brief historical background, and covers parts of the aeroplane, loads, structural form, materials, processes, detail design, quality control, stressing, and the documentation associated with modification and repairs. The Fourth Edition takes account of new materials and the new European regulatory system.

Fishes of the Cambodian Mekong (FAO Species Identification Field Guides), Manual of trigonometry .., Waves in the Atmosphere: Atmospheric Infrasound and Gravity Waves, Their Generation and Propagation (Developments in Atmospheric Science), French Lesson 5: Toys & Games (Easy-Peasy French for Kids), The Soul of the Ape,
