

This is a major new field guide for North America, indeed a new generation guide. Not since the National Geographic Guide almost 20 years ago has there been such an advance in field guides for this region. Every species is illustrated with just one or two species per page, giving several plumages and poses for each bird, and with identification features highlighted at appropriate places. Every species has a distribution map. This long-awaited title by one of Americas best birders and artists is set to become a classic.
