

Emergent Vector Space Violations in Relativity and Missing Dark Matter

Scientific paper outlining blatant errors in Einsteins Relativity and in Dark Matter theory for public review. The Peer Review process requires multiple PhD sponsors, none of which are willing to touch this, because they evidently do not understand it themselves. While I have not yet completed the differentials, I have provided ample evidence that Einsteins equations are wrong, and Newtons equations are in fact correct. As laid out in the paper, Einstein got the right answer for the wrong reason.
